

Head of Development

We are looking for a talented Head of Development for Starcounter, to coach and technically guide our development team. Starcounter develops the world's fastest transactional database. Our development team ranges from PhDs in computer science to self-taught whiz kids, able to develop with focus on extreme performance and an ease of use out of the ordinary. As Head of Development your focus will be to manage and enable the Starcounter development team, delivering quality, on-time releases of the Starcounter database.

Required skills and experiences:

- Documented technical team management experience
- Solid experience from software development
- Strong and clear as a leader
- Passion for technology – for real
- Experience from Git och GitHub
- Experience from unittestning
- Experience from high level languages as Java or C#

For application and questions, please contact:

Åsa Holmström, asa.holmstrom@starcounter.com, 0708 – 53 83 83

Starcounter

Starcounter is a database development company dedicated to providing the world's highest performing, general purpose database to the enterprise markets. Founded in 2006 by entrepreneur Joachim Wester, Starcounter's goal is to simplify database processing while cutting costs. Its technology is ACID compliant, and performs best with high transactional, real-time applications.

Starcounter headquarters is at Nybrogatan, Stockholm, Sweden.
